China Day Musical Performance!

QISS put on a fantastic show for China day last Saturday! Grade 2 did an excellent job in their performances, great work! We were so happy to see some parents perform with their students as well. Thank you all for your hard work!

Hello Grade 2 Parents!

Grade 2 did an amazing job with their Unit 2 Key Assignment! The students spent Unit 2 learning about inventions and how they come from need. We looked at the problems we face in our community of Qingdao, and what we could do to solve them. The class decided that the biggest problem in our community of Qingdao is the air pollution.

We kept track of the Air Quality Index throughout Unit 2, and we saw that as the weather got colder, the pollution got worse. The students made a video explaining what air pollution is, how it is made, and what we can do to help solve this problem. Then the students presented their ideas for new inventions that could help to improve the air quality in Qingdao. The students advised everyone to wear a mask outside in winter, and showed the different types of masks. Colin also showed his invention that could prevent pollution from getting inside QISS! Be proud of the work that Grade 2 accomplished this Unit!
